Facilitator: Overview of Main Points

- Intersectional discrimination replicated through institutions; institutions as unsafe spaces
- Young people report feeling disconnected from communities and institutions
- Individual effects of institutional discrimination
- Emphasis this year on education and justice systems, likely due to lower numbers of children in care engaged in STM 2018 events
- Balance between individual and collective experiences and responses
  - How to balance engaging youth and surfacing their voices as rights holders and then how much do “we” do to push duty bearers to respond
  - Eg children identify lack of rights education in school system as a major issue yet school also major site for discrimination and exclusion at individual and systemic levels
